SZH Series Double Cone Mixer

Introduction

The SZH series double cone mixer transfers powder or granular materials into the double cone container by vacuum conveying or manual feeding. With the continuous rotation of the volume, the material undergoes complex impact movement in the container to achieve uniform mixing.

Application

This machine is suitable for mixing powdery and granular materials in the pharmaceutical, chemical, food, and building materials industries.

Features

This machine saves energy, is easy to operate, low labor intensity, and high work efficiency

Working Principle

This machine transfers powder or granular materials into a double cone container through vacuum conveying or manual feeding. With the continuous rotation of the volume, the materials perform complex impact motions in the container to achieve uniform mixing.
